

# Fyra Oyer Ecosystem Play-to-Earn Economics

# Fyra Oyer In-Game Economics Overview

The Fyra Oyer Ecosystem will have a specially-designed Play-to-Earn Economy with (5) components:

- Governance Token (\$BAAH)
- Fables of Fyra In-Game P2E Currency (\$CAVE)
- NFT Land
- NFT Dragons
- NFT Items

Each component of the economy plays a unique role in ensuring the sustainability and viability of the overall franchise.

NFT Items

# Governance Token { \$BAAH }

**\$BAAH is a cross-franchise, essential, and long-standing utility token that will provide holders access to multiple benefits within The Awakening and future games.**

## Staking

Used in conjunction with \$CAVE to level up NFT Land, which increases in-game earning capabilities and allows access to the \$BAAH Gold/Silver Key Land Holder Bonus Pool.

## Holder Status

Specific \$BAAH levels and holding periods paired with NFT ownership will allow holders to take on unique roles within the Fyra Oyer Ecosystem.

Holders will be given FIRST, EARLY, and EXCLUSIVE access to qualifying cross-franchise, in-game material such as downloadable content, digital items, and action packs.

\$BAAH Rewards Pool will be dispersed to the community in many ways, such as: holder benefit programs, in-game bonuses, tournament payouts, and participation incentives.

Great care has been taken to develop unmatched transparency, liquidity assurance, and a token distribution approach that addresses issues experienced with other play-to-earn gaming governance tokens.

# Fables of Fyra In-Game P2E Currency {SCAVE}

\$CAVE is the lifeblood of the In-Game P2E Economy. \$Cave will be used for everything from in-game purchases to paying minting fees for converting hard-earned items into NFT's.

\$CAVE facilitates proof-of-play functionality and can be mined by performing tasks, completing quests, scavenging, and unlocking new locations throughout a player's kingdom.

The number of tokens mined by a player will vary based on certain conditions, such as (but not limited to) the following examples:

- **Daily Mining Allotment**
- **Competition**
- **NFT Dragons Assigned to the Land**
- **NFT Land Level and NFT Additions**

\$CAVE is an ERC-20 Crypto Token that lives on the Ethereum, Polygon, and Elysium blockchains.

To earn \$CAVE, a player must connect a wallet, such as MetaMask, and own NFT Land.

# Land of Fyra Oyer

When minting NFT Land, a player is provided access to an entire kingdom!

There are (3) land options. Each option offers differing levels of access to the Fables of Fyra Franchise and unlocks benefits through ownership.

**Free  
Premium  
NFT Land**

There are 3 tiers of NFT Land:

**Gold Key Land  
Silver Key Land  
NFT Land**

The Gold and Silver Key plots will be extremely limited and will provide special benefits to holders.

An NFT Land plot is required to participate in the Play-To-Earn Economy, earn \$CAVE, and increase daily earnings with NFT Dragons and Enhancements.

NFT Land is limited within the ecosystem and, once sold out, can only be purchased on the secondary market or when new kingdoms open.

# NFT Dragons

As inhabitants of Fyra Oyer, the dragons of Dreka, Klaki, Eldur, and Vatten are at the center of the Play-To-Earn economy within The Awakening. The player's NFT Dragon will provide many advantages in-game as well as increasing the daily earning ability.

Each NFT Dragon will have unique elemental attributes, strengths, and weaknesses based on the kingdom from which they hail. Each NFT Dragon will have one or more elements that impact gameplay based on their heritage.

NFT Dragons also have individual traits that will impact gameplay. These traits do not appear in free dragons.

Smart

Quick

Charming

Starting a family in the Fables of Fyra ecosystem gives you benefits within the game and can increase a player's share of the daily rewards allocation. When a player breeds NFT Dragons they receive a larger home cave, acquire helpers for chores around the farm, and gain access to the additional attributes and traits of the spouse and children.

Each dragon added to a player's land will entitle a player to additional shares of the daily rewards pool based on position, lineage, generation, and rarity. A fully upgraded plot of land can hold up to 12 NFT Dragons!!!

# NFT Item Review

## In-Game Items/Efficiency NFTs

These NFTs are used to complete complex recipes, advanced quests, or increase the efficiency of a player's ability to earn their daily reward shares within Fables of Fyra: The Awakening.

## Land Enhancement NFTs

Land Enhancement NFTs, when applied to a kingdom (piece of land), increase the daily shares of the \$CAVE daily rewards pool allocated to that kingdom. Land Enhancement NFTs come in (5) different classes based on their rarity and effectivity length.

## Novelty NFTs

These NFTs don't have specific In-Game or Land Enhancement benefits but allow players to individualize their kingdom and overall experience. The novelty class of NFTs includes skins for NFT Dragons, Seasonal Characters, and Special Plants or Bushes that allow players to express who they are within the ecosystem.
