

The Dragons of Fyra Oyer

As inhabitants of Fyra Oyer, the dragons of Dreka, Klaki, Eldur, and Vatten are at the center of the Play-To-Earn economy within The Awakening. The player's NFT Dragon will provide many advantages in-game as well as increasing the daily earning ability.

Dragon Attributes

Each NFT Dragon will have unique elemental attributes, strengths, and weaknesses based on the kingdom from which they hail. Each NFT Dragon will have one or more elements that impact gameplay based on their heritage.

For free dragons, these will be the only attributes that impact gameplay.

Vatten

Dreka

Eldur

Klaki

Heritage Bonus

Water Activities (fish without a pole and cross water without a boat)

Farming Activities

Construction

Buying and Selling

Dragon Traits

Icons	Trait	Ability Bonus
	Strong	Allow more inventory slots and can carry more per slot
	Smart	Faster crafting time for items or food
	Quick	Move faster and have faster actions (mining, fishing and in quests)
	Charming	Better prices on the markets (both for purchases and sales)
	Perspective	Has an improved chance of finding random items foraging
	Creative	Unlocks crafting of artistic items that command higher sales price
	Thrifty	Increase durability of all inventory items by 25%
	Wise	Increases experience gain when learning

NFT Dragons also have individual traits that will impact gameplay. These traits do not appear in free dragons.

Breeding

Starting a family in the Fables of Fyra ecosystem gives you benefits within the game and can increase a player's share of the daily rewards allocation. When a player breeds NFT Dragons they receive a larger home cave, acquire helpers for chores around the farm, and gain access to the additional attributes and traits of the spouse and children.

Breeding Rules

1. Each NFT Dragon can only breed one time.
2. A player must first raise a dragon to adulthood before they are eligible for breeding. The player accomplishes this task by using their NFT Dragon inside the Dragon Garden Game and reaching a level of 75 or higher. *For more information, please see Dragon Garden on the Fables of Fyra website.*
3. The dragon babies will inherit the elemental attributes from both parents. They will also be assigned traits based on the traits of their parents. *Please see Dragon Attributes and Dragon Traits for additional details.*

Father

Mother

Unbred Male

Unbred Female

{Can Breed 1 Time, Denoted by the Dragon Head in the Center}

Juni Leaves are important assets in breeding. There are two (2) styles of Juni Leaves- a pink version and a blue version. Using a blue Juni Leaf will ensure a male child in breeding, while a pink Juni Leaf will ensure a female child. Using two Juni Leaves results in the ability to guarantee twins and determine the sex of each twin.

If no Juni Leaves are used, then having a boy or girl and potentially twins is left up to chance!

NFT Dragons: Base Daily Share Allocation and Bonuses

One way to increase the number of shares of the \$CAVE daily rewards pool is to assign NFT Dragons to land. Each dragon added to a player's land will entitle a player to shares of the daily rewards pool based on position, lineage, generation, and rarity.

The chart below shows how many dragons can be assigned to a kingdom based on land level:

	Level 1	Level 2	Level 3	Level 4	Level 5
Player Dragon	1	1	1	1	1
Adult Dragon	1	1	1	1	1
Child/NFT Dragon	2	4	6	8	10
Total Dragons Assigned	4	6	8	10	12

Note: The child slots can be filled with any NFT Dragon regardless of generation or lineage.

The 1st NFT Dragon assigned to a player's land will assume Slot 1, known as the **Player Slot**. This dragon will earn 2.5x the shares of the daily \$CAVE rewards pool based on lineage, generation, and rarity.

The 2nd Dragon assigned to a player's land will assume Slot 2, known as the **Adult Dragon Slot**. The NFT dragon assigned to this slot will earn 1.5x the shares of the daily \$CAVE rewards pool based on lineage, generation, and rarity.

Depending on the level of the land, the remaining spots, Slots 3-12, are titled **Child Slots**. The NFT Dragons assigned to slots 3-12 (Child Slots) will earn 1x the shares of the daily \$CAVE rewards pool based on lineage, generation, and rarity.

Daily \$CAVE Rewards: Position Multiplier

Player Slot (Slot 1)	2.5x	Multiplier
Adult Dragon Slot (Slot 2)	1.5x	Multiplier

Daily \$CAVE Rewards Pool Shares: Lineage, Generation, Rarity

Genesis Dragon	0.35	Shares
OG Dragon	0.30	Shares
Gen 1 Dragon	0.10	Shares
Gen 2 Dragon	0.15	Shares
Gen 3 Dragon	0.25	Shares
Rarity Class A (1-99 Editions)	0.20	Shares
Rarity Class B (100 Editions)	0.15	Shares
Rarity Class C (101+ Editions)	0.10	Shares

Note: The child slots can be filled with any NFT Dragon regardless of generation or lineage.

In-Game Enhancements

Land Enhancement, In-Game Items/Efficiency, and Novelty NFTs

There are three classifications of NFTs that can be purchased on marketplaces, within Fables of Fyra: The Awakening, and found while foraging and crafting within Fyra Oyer

**In-Game Items/
Efficiency NFTs**

These NFTs are used to complete complex recipes, advanced quests, or increase the efficiency of a player's ability to earn their daily reward shares within Fables of Fyra: The Awakening.

**Land Enhancement
NFTs**

Land Enhancement NFTs, when applied to a kingdom (piece of land), increase the daily shares of the \$CAVE daily rewards pool allocated to that kingdom. Land Enhancement NFTs come in (5) different classes based on their rarity and effectivity length.

Novelty NFTs

These NFTs don't have specific In-Game or Land Enhancement benefits but allow players to individualize their kingdom and overall experience. The novelty class of NFTs includes skins for NFT Dragons, Seasonal Characters, and Special Plants or Bushes that allow players to express who they are within the ecosystem.

Land Enhancement NFTs

Land Enhancement NFTs, when applied to a kingdom (piece of land), increase the daily shares of the \$CAVE daily rewards pool allocated to that kingdom. Land Enhancement NFTs come in (5) different classes based on their rarity and effectivity length.

Certain class Land Enhancement NFTs and the number of these NFTs that can be utilized concurrently are based on the level of the land in which they are being applied.

Land Enhancement NFTs					
Trait	Class 1	Class 2	Class 3	Class 4	Class 5
Rarity	Very Common	Common	Less Common	Rare	Very Rare
Effectivity Length	24 Hour	24 Hour	1 Week	1 Month	Longer than 1 Month
Land Level Requirement	1	1	3	4	5
Found in-Game	Yes	Yes	Yes	No	No
In-Game Contest Reward	No	No	Yes	Yes	Yes
Market Place Release(s)	No	No	Yes	Yes	Yes
Component of FoF OG Set Holders	No	No	No	No	Yes

In-Game Items/Efficiency NFTs

These NFTs are used to complete complex recipes, advanced quests, or increase the efficiency of a player's ability to earn their daily reward shares within Fables of Fyra: The Awakening.

Farmable Resources

To grow crops, players need seeds, which can either be purchased or forged. Seeds for standard and rare crops can be bought as NFTs, and specialty crops can also be purchased. Players will learn that some crops are continuous yield while others need to be replanted. NFT Seeds, Fruits, and Vegetables are integral in completing advanced recipes and certain quests.

Durable Items

In order to efficiently complete tasks, players will need durable items. These durable-item NFTs can be crafted in-game to be sold, rented, or purchased on marketplaces and from the Cave Dragons. These durable items significantly reduce the time it takes to earn the maximum shares of the \$CAVE daily rewards pool.

Tutors

There are several NPC characters that can help the player learn things faster. By completing quests for the tutors, they will offer their services to the player for a certain amount of time. A player can also hire the tutors when they are working towards certain skill goals.

The tutors are only able to help the player gain experience until the player reaches the tutor's level. Once the player becomes a master themselves, the tutor's services are no longer useful.

Farm Hands

The player can also engage farm hands to help with certain tasks. A farm hand works on their own tasks, such as watering plants, feeding animals, gathering items.

Once a player has hired a farm hand, they work for the allotted time doing their task.

Novelty NFTs

These NFTs don't have specific In-Game or Land Enhancement benefits but allow players to individualize their kingdom and overall experience. The novelty class of NFTs includes skins for NFT Dragons, Seasonal Characters, and Special Plants or Bushes that allow players to express who they are within the ecosystem.
